

TOPIC 11 — INTERNAL KNOWLEDGE ASSISTANT GPT

Assessment Submission & Validation Report

1. Project Overview

Built a Custom GPT named **Internal Knowledge Assistant** to answer employee questions strictly from uploaded internal company documentation. The configuration emphasizes document-grounded answers, refusal of unsupported questions, no hallucination, and bold source references.

2. Working Resources

Resource	Link
Working GPT	https://chatgpt.com/g/g-6ab7ada5cc4c8191b4b3b4501e48f8f5-internal-knowledge-assistant
GitHub	https://github.com/shaikshahid777/ai-internal-knowledge-assistant
Loom Demo	https://www.loom.com/share/aaf1f04ca35a45619b294cc8fec963a0

3. Knowledge Documents

- **employee_leave_policy.md** — internal leave policy covering annual leave, notice, requests, approval, cancellation, emergency leave, and undocumented areas.
- **employee_faq_process_guide.md** — FAQ and process guide covering common leave questions and the documented leave request process.

4. GPT Configuration

- Role: Internal Company Knowledge Assistant.
- Scope: Answers only from uploaded internal documentation.
- Grounding: No external knowledge, assumptions, speculation, or personal opinions.
- Source referencing: Factual answers include bold document and section references.
- Capabilities: Web Search, Image Generation, and Code Interpreter & Data Analysis disabled.
- Recommended model: No Recommended Model.

5. Validation — 3/3 Tests Passed

Test	Scenario	Result
1	Fully Covered — Annual leave entitlement	PASS
2	Partially Covered — Sick leave entitlement/process	PASS
3	Uncovered — Remote work policy	PASS

Test 1 — Fully Covered

Question: "What is the company's annual leave entitlement?" The GPT correctly returned 24 days for full-time employees and supplied bold source references to the relevant policy and FAQ sections.

Test 2 — Partially Covered

Question: "How many sick leave days am I entitled to, and how do I apply for sick leave?" The GPT correctly stated that the available documentation does not specify sick leave entitlement or a separate sick-leave procedure, without inventing information.

Test 3 — Uncovered

Question: "What is the company's remote work policy?" The GPT correctly explained that the uploaded documentation does not contain a remote work policy and did not provide unsupported external information.

6. Deliverables

- Working Custom GPT
- employee_leave_policy.md
- employee_faq_process_guide.md
- instruction_block.md
- test_results.md
- Loom demonstration video
- GitHub repository

7. Challenges, Resolutions & Assumptions

Challenge: Preventing answers outside the uploaded documentation.

Resolution: Strict document-only instructions, refusal rules, source-reference requirements, and disabled Web Search.

Challenge: Handling partially covered questions without hallucinating missing details.

Resolution: Added a partial-coverage rule requiring only supported information and explicit identification of missing information.

Assumption: The two uploaded documents are the authoritative internal assessment documents and are intentionally consistent.

8. Final Result

3/3 required coverage tests passed. The GPT demonstrated document-grounded answering, source referencing, and appropriate handling of fully covered, partially covered, and uncovered questions.
